(54) Titre : CLONE CELLULAIRE RECOMBINE STABLE, SA PRODUCTION ET SON UTILISATION

(54) Title: RECOMBINANT STABLE CELL CLONE, ITS PRODUCTION AND USE THEREOF

## (57) Abrégé/Abstract:

The invention relates to a stabile recombinant cell clone which is stabile in a medium containing no serum and proteins for at least 40 generations, and to a biomass which is obtained by multiplying the stabile cell clone under cultivation conditions that do not involve the use of serum or proteins. The invention also relates to a method for producing recombinant proteins using the biomass, to a method for producing stabile recombinant cell clones, and to the production of a recombinant protein in a synthetic minimal medium that does contain serum or proteins.
